creative equipment communication

## applications » hotel

with your logo on screen

weather, emergency announcement

suggestions, video and photos, live broadcasts, presentations...

news, info headlines, local news

event schedule, presentations & operating hours: restaurant, pool bar, kid cinema, etc...

### information and welcome screen

First impression is very important. With Panel TV you welcome your guests/clients creating a unique/special and particular friendly atmosphere. Within minutes you present your services, you conduct in space/guide through space and inform for every important event, happening or offer they concern.

Whether it is simple screen hanging from the reception, either its for vertical screen – stand in central places, or small signage screen spread around, Panel TV has the experience and capability to suggest solutions that fit with the hotel decoration and communicate effectively your messages.

More possibilities depending hotel nature:

- » Live broadcasts: for every important circumstance is taking place at your hotel (conference, event etc) can be transmitted live or in the future time from the screens.
- » Usable information live: flight schedule and ship departure
- » News feeds: world headlines (RSS feeds)

## infochannel - myhotel tv

In every room, the visitor can choose one extra channel, the "hotel channel", with your hotel logo and with specific content for every hour of the week or season.

Everyday operation is automated, while the program refresh as frequent you wish and incorporates all the important information about the hotel and its services, presentation of the supervisor or each sector, dish/menu of the day and every special event is taking place at the hotel (conference, circumstance) that can be broadcast live or in future time from the "hotel channel".

\*no Pay TV, IPTV or Web TV system

### music and sound messages to each area

Every area of the hotel can have its own soundtrack with separate/special style and different level. The hotel can have multiple sound channels and depends on the circumstance to choose different sounds.

Except music soundtrack, urgent or pre-recorded announcements can be made with the push of a button to selected hotel areas, though local area network – without new wiring. If it is desirable, standard messages can be broadcast automated in specific hours during the day and according to hotel schedule.

### mytouch board

They are beautiful and elegant structures with large touch screen multiple finger point, that display information or text in a systematic way. Themes can be freshening up centrally and can be shown in different languages. Size and the way information is displayed are adjustable in every hotel preferences.

Mytouch-boards could be used for:

- » interactive menus, where guests could see the dish of the day and browse the restaurant flavor suggestions
- » getting familiar with hotel services, program information events, guests guidance etc.
- » impressive innovations, upgrade technological hotel areas without major interference in hotel architecture and harmony/conquity
